INTRODUCTION

TO THE CUSTOMER

Thank you for purchasing a Geith Quick Coupler. Geith attachments are designed and manufactured to the highest quality standards and backed up by the Geith commitment to service and parts support. www.geith.com

WARNING

Instructions are necessary before operating or servicing the equipment. All personnel must read and understand the Operation And Installation Manuals and signs (decals) on the equipment. Follow warnings and instructions in the manual when making adjustments, repairs or servicing. Check for correct function after making adjustments, repairs or servicing. Failure to follow instructions can cause injury or death.

IDENTIFICATION
**INTRODUCTION**

**APPLICATION RECOMMENDATIONS**

The Geith range of quick couplers are designed for use with all makes of excavators, combined with a wide range of attachments, to suit a wide range of work applications.

![warning]

**WARNING**

It is the responsibility of the owner and operators of the quick coupler to ensure that the quick coupler is used and maintained in a safe and appropriate manner that will not cause damage to or make unsafe in any way, the operation of the quick coupler or equipment being used.
SAFETY INSTRUCTIONS

⚠️ Safety Alert Symbol ⚠️

This symbol is used to call attention to instructions concerning personal safety. Be sure to observe and follow these instructions.

⚠️ DANGER ⚠️

The signal word DANGER on the equipment and in the manual identifies a hazardous situation which, if not avoided, WILL result in death or serious injury.

⚠️ WARNING ⚠️

The signal word WARNING on the machine and in the manual indicates a potentially hazardous situation which, if not avoided, COULD result in death or serious injury.

⚠️ CAUTION ⚠️

The signal word CAUTION on the machine and in the manual indicates a potentially hazardous situation which, if not avoided, MAY result in minor or moderate injury. It may also be used to alert against unsafe practices.

This notice identifies procedures which must be followed to avoid damage to the machine.

Instructions are necessary before installing, operating or servicing the equipment. All personnel must read and understand this Installation Guide and the Operation Manual and signs (decals) on the equipment. Follow warnings and instructions in the manual when installing, making adjustments, repairs or servicing. Check for correct function after installing, making adjustments, repairs or servicing. Failure to follow instructions can cause injury or death.
SAFETY

Installation Safety

- Position the machine on even, firm and level ground.
- Lower work equipment to the ground and stop engine before performing maintenance. Remove machine key.
- Make sure to lock out hydraulic controls and place a “DO NOT OPERATE” Warning Tag on the machine to indicate that machine is being serviced and to prevent any unauthorized operation.
- Put blocks under track / wheels to prevent the machine from moving.
- Allow the machine to fully cool before servicing.
- Always depressurise hydraulic system before servicing.
- Collect and retain all oil released from system during maintenance.
- Welding or grinding painted parts should be done in well ventilated areas.
- Wear a dust mask when grinding painted parts. Toxic dust and gas can be produced.
- Avoid contact with leaking hydraulic fluid or diesel fuel under pressure. It can penetrate skin or eyes.
- Keep arcs, sparks, flames and lighted tobacco away from batteries.
- When performing maintenance on machine, prevent tripping and falling by keeping area around your feet clean and free of objects and debris.
SAFETY

Welding and Grinding

Always clean machine and attachment, set battery disconnect switch to “OFF” position, and disconnect wiring from electronic controllers before welding. Cover rubber hoses, battery and all other flammable parts. Keep a fire extinguisher near machine when welding.

Toxic dust or gas can be produced when grinding or welding painted parts. Grinding or welding painted parts should be done in a well ventilated area. Wear dust mask when grinding painted parts.

Dust generated from repairing nonmetallic parts such as hoods, fenders or covers can be flammable or explosive. Repair such components in a well ventilated area away from flames or sparks.

Do not weld on lines or on tanks that contain flammable fluids. Do not flame cut lines or tanks that contain flammable fluid. Clean any such lines or tanks thoroughly with a nonflammable solvent before welding or flame cutting.
SAFETY

DECAL INSTALLATION

Instruction and warning decals are supplied with this quick coupler.

Figure 1

![Decal Installation Diagram](image)

Install the two decals inside of the cab window [Figure 1], close to the control box.

NOTE: Replace any damaged instruction and warning decals.

Operating Instructions decal (1) [Figure 1].

Operating Instructions decal (2) [Figure 1].
## INSTALLATION

### KIT COMPONENT IDENTIFICATION

**NOTE:** Generic list: Content may vary per machine model.

Open kit box and remove all components.

SETUP

Before installation is started on twin hydraulic pump systems, confirm which hydraulic pump operates the dipper and bucket cylinder. (See the excavator’s Operation And Maintenance manual.)

CONTROL BOX

Installation

NOTE: Follow the control box manufacturer’s guidelines when installing the control box. Failure to do so will result in poor adhesion and will result in the control system becoming detached from the window should you opt for the glass suction mount option.

Figure 2

Position the control box (1) [Figure 2] to the right of the front control panel in the operator cab. See NOTE

Clean the window area with an isopropyl alcohol wipe, not supplied.

Heat the machine cab up until it reaches 20°C / 68°F to dry excess moisture and heat the window (if required). See NOTE
INSTALLATION

Control Box Mounting Options

Figure 3

Glass Mount Option (1) [Figure 3].

Figure 4

For glass mounting, assemble the following in the order listed:

- Screw (Item 1) [Figure 4]
- Pivot ball (Item 2) [Figure 4]
- Pivot receiver (Item 3) [Figure 4]
- Nurled knob (Item 4) [Figure 4]
- Mount (Item 5) [Figure 4]

Figure 5

Panel or cab mount (1) [Figure 5].

Figure 6

For panel or cab mounting, assemble the following in the order listed:

- Screw (Item 1) [Figure 6]
- Pivot ball (Item 2) [Figure 6]
- Pivot receiver (Item 3) [Figure 6]
Harness Connections

Figure 7

Locate a suitable 12 / 24V fused appliance (cigarette lighter) (1) [Figure 7].

Connect the control box into the desired fused appliance.

Secure all wiring with tie straps.

Battery Isolator Switch Optional Connection

Figure 8

Connect wire (RED) (1) to fused appliance, main battery isolator switch or ignition live side. Connect wire (BLACK) (2) [Figure 8] to a ground terminal.
INSTALLATION

QUICK COUPLER HYDRAULIC HOSE / ELECTRICAL HARNESS INSTALLATION

Boom (Without Manifold)

The following is a generic boom hose installation. The images may not show your machine exactly as it appears but the procedure is correct for all machines.

WARNING

HIGH PRESSURE FLUID HAZARD

To prevent serious injury or death from high pressure fluid:

- Relieve pressure on system before repairing or adjusting.
- Wear proper hand and eye protection when searching for leaks. Use wood or cardboard instead of hands.
- Keep all components in good repair.
- Stop the engine and release all hydraulic pressure in the system.

AVOID INJURY OR DEATH

Before installing boom hoses:

- Lower the work equipment to the ground.
- Stop the engine and remove the key.
Locate the two link hoses Items 2 & 2A on component identification list.

Install and tighten the two link hoses (1) [Figure 9] to the quick coupler hydraulic cylinder (one on either side of the port block).

Install the quick coupler onto the machine.

NOTE: Verify that all O-ring seals required are fitted to the quick hitch on both link and dipper positions.

Route the link hoses from the quick coupler cylinder along the arm and boom hoses.

Place a straight edge square on the side of the dipper, place a mark at the top of the straight edge (1). Place a second mark (2) [Figure 10], in the center (left to right) of the dipper.

Move up the arm and place the straight edge square on the side of the dipper. Place a mark at the top of the straight edge (on the left side of dipper).
INSTALLATION

Figure 11

Locate the two twin clamps Item 17 on component identification list.

Using one of the twin clamps, mark the shape (1) [Figure 11] of the base of the clamp at each of the previously marked positions on the dipper.

NOTE: Ensure top clamp is located to one side and angled slightly to direct hoses along the side of the boom.

WARNING

Before welding, disconnect battery cables. Connect the welding ground as close as possible to the area being welded.

Figure 12

Position the clamp base plates (1) in the marked positions. Weld along top and bottom (2) [Figure 12] edges of the clamp base plates to secure in position.

Repeat this procedure on all clamps.

Clean all welded surfaces.

Eye and body protection is required when grinding or welding. Wear approved goggles, helmet and clothing. Failure to wear eye and body protection can result in serious injury.

Using a sharp edged tool, scrape off paint at edges (2) [Figure 11] of marked areas to allow good contact to metal for welding of the hose clamp bases.
INSTALLATION

Figure 13

Paint the clean welded area (1) [Figure 13] to match the dipper at all clamp locations.
Install lower section of the clamp.

Figure 14

Push back the spring cover (if required) on the two link hoses (1) [Figure 14], place each hose in the clamp. Install the top section (1) of the clamp and install and tighten bolt (3) [Figure 14].

Figure 15

Locate two couplers Item 7 on component identification list.
Install the two couplers (1) [Figure 15] into the link hoses.

Figure 16

Locate two hoses Items 1 & 1A on component identification list.
Install and tighten the two hoses onto the couplers [Figure 16].
INSTALLATION

Figure 17
Route the two hoses (1) [Figure 17] up the dipper and installing the hoses into the clamps as needed.

Figure 18
With hoses secured to dipper arm, route the hoses along the existing dipper ram supply hose line [Figure 18].

Figure 19
Route hoses along existing boom supply hose line at the base of the boom [Figure 19].

Secure hoses with cable ties along the base of the boom [Figure 19].

NOTE: Leave approximately 300 mm (12 in.) between cable ties.
Route the hoses from base of boom through compartment wall (1) [Figure 20].

Locate a position for placement of solenoid valve in pump housing compartment. Mark location of valve retaining holes for drilling.

**NOTE:** Location of the solenoid valve usually use mounting bracket supplied or on the compartment wall.

Drill holes in previously marked position.

**NOTE:** Be careful not to drill into any part or component that maybe located on opposite side of the compartment wall being drilled.

**NOTE:** Do not mount valve at this time.

Confirm the tank pressure is released from the tank (1) [Figure 21]. (See the excavator’s Operation And Maintenance Manual for procedure.)

Connect tank `T` fitting (1) [Figure 22] to tank port and connect hose to branch.

Route hose through compartment panel (2) [Figure 22].
**INSTALLATION**

**Figure 23**

Locate and follow the dipper arm bucket ram outstroke port supply line (1) [Figure 23] to the base of the boom.

**Control Valve And Pressure Switch**

Locate the bucket ram `T' fitting in the kit.

**Figure 24**

Insert T fitting or flange fitting (1) [Figure 24]. Connect the pressure switch to the T piece or flange fitting branch.

Connection:

Connect the hydraulic hose (RED) to the hydraulic pump test port.

**NOTE:** On a twin hydraulic pump system connect the hydraulic hose (RED) to the hydraulic pump test port that operates the dipper and bucket cylinders.

**NOTE:** It is recommended to install a T fitting between the hydraulic pump test port and the hydraulic hose for future hydraulic pump testing.

**Figure 25**

When connecting hydraulic hoses to the valve body [Figure 26] and quick coupler [Figure 27], connect the hydraulic hoses in the following order: banjo bolt / hitch bolt (1) through the bonded washer (2), hydraulic hose (3), bonded washer (4) [Figure 25] then into the valve body (not shown).
Connect the hydraulic hose (RED) (1) [Figure 26] valve port P(3).

Connect the hydraulic hose (GREEN) (2) [Figure 26] valve port T(1).

Connect the hydraulic hose (YELLOW) (3) [Figure 26] valve port A(2).

Connect the hydraulic hose (BLUE) (4) [Figure 26] valve port B(4).

Connect hydraulic hose (YELLOW) (1) [Figure 27] to the (V1) port on the quick coupler.

Connect hydraulic hose (BLUE) (2) [Figure 27] to the (V2) port on the quick coupler.

**Electrical (Full Kit)**

Connect the wiring harness (1) [Figure 28] to the coil of the 4 port solenoid valve.
INSTALLATION

Figure 29

Connect the wiring harness (1) [Figure 29] to the pressure switch at the boom base.

Figure 30

Connect control box (1) [Figure 30] to wiring harness.

COMPLETION AND TESTING

For all excavator operation, see the excavator's Operation And Maintenance Manual.

Enter the excavator. Start the engine. Install the quick coupler.

Operate the quick coupler through several cycles. With the engine running have a second person check for leaks.

Load Test

NOTE: This is to be accomplished in an area clear of personnel and obstacles.

Connect attachment to the quick coupler.

Open or curl the coupler.

Lower attachment to within 300 mm (12 in.) of the ground.

Shut off machine.

Do not touch controls for ten minutes.

If no movement occurs testing is complete.

NOTE: If movement occurs see the quick coupler's Operation And Maintenance Manual.
WARRANTY

WARRANTY PROGRAM

The Company warrants the Equipment (except for parts) sold by it to the Purchaser to be:

- Free of defects in material and workmanship for a period of twelve (12) months from the date of shipment or 2000 hours of use, whichever first occurs unless formal documentation can be produced when the product has been put into use. A period of six (6) months shelf life will be accepted on all products. Any product not put into use before the six (6) months stocking and twelve (12) warranty period will forfeit any warranty given on the product. The Geith generic installation/hose assemblies will be covered for a period of six (6) months from the date of shipment (installation kit covered only in Europe).

- The applicable warranty time period for parts shall be six (6) months from the date of shipment and for reconditioned parts or products shall be three (3) months from the date of shipment. At the discretion of the company a longer thirty six (36) month warranty period may be offered to selected customers. This warranty period only covers the frame/chassis of the product and excludes all other components attached to the frame/chassis.

- No warranty will be accepted for wear/damage on products or components thereof.

The Company will provide a new part or repaired part, at its election, in place of any part which is found upon its inspection to be defective in material or workmanship during the periods described above. Such part will be repaired or replaced without charge to the Purchaser providing the warranty cost does not exceed the standard cost which has been set out by the company in the standard cost table (this cost is available upon request). The company will accept maximum warranty costs not exceeding the original sale value.

The replacement or repair must be carried out during normal working hours at the place of business of a distributor of the Company authorised to sell the type of Equipment involved or other establishment authorized by the Company. The purchaser must report failures within a maximum time of 30 days of occurrence and file a warranty claim within a maximum of 30 days thereafter. Warranty claims outside this period of time will forfeit the warranty cover.
WARRANTY

Purchaser must present proof of purchase (and purchase date) at the time of making a claim under this warranty. Warranty claims do not apply to failures occurring as a result of abuse, misuse, negligent repairs, corrosion, erosion, normal wear and tear, alterations or modifications (which includes use of non Geith control systems) made to the Equipment without express written consent of the Company, or failure to follow the recommended operating practices, or service and maintenance procedures as provided in the Equipment's operating and maintenance publications. All maintenance, service and repair work must be completed by an authorised Company distributor or establishment and only genuine Company parts shall be used in such work. Failure to comply strictly with these requirements shall invalidate this warranty. The warranty provided herein does not apply to any components which are not supplied by the company (this includes engines, hydraulic systems, boom, dipper, etc) which are manufactured by others as they are warranted by their respective manufacturers directly to the Purchaser.

THE COMPANY DISCLAIMS AND EXCLUDES ALL OTHER CONDITIONS, WARRANTIES OR REPRESENTATIONS OF ALL KINDS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE (EXCEPT THAT OF TITLE), INCLUDING ALL IMPLIED WARRANTIES AND CONDITIONS RELATING TO MERCHANTABILITY, SATISFACTORY QUALITY AND FITNESS FOR A PARTICULAR PURPOSE. Corrections by the Company of nonconformities whether patent or latent, in the manner and for the period of time provided above shall constitute fulfillment of all liabilities of the Company for such nonconformities, whether based on contract, warranty, tort, negligence, indemnity, strict liability or otherwise with respect to or arising out of such Equipment.

LIMITATION OF LIABILITY

THE REMEDIES OF THE PURCHASER SET FORTH HEREIN ARE EXCLUSIVE AND THE TOTAL LIABILITY OF THE COMPANY WITH RESPECT TO THE CONTRACT OR THE EQUIPMENT AND SERVICES FURNISHED HERUNDER, IN CONNECTION WITH THE PERFORMANCE OR BREACH THEREOF OR FROM THE MANUFACTURE, SALE, DELIVERY, INSTALLATION, REPAIR OR TECHNICAL DIRECTION COVERED BY OR FURNISHED UNDER THE CONTRACT, WHETHER BASED ON CONTRACT, WARRANTY, TORT, NEGLIGENCE, INDEMNITY, STRICT LIABILITY OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE OF THE UNIT OF EQUIPMENT UPON WHICH SUCH LIABILITY IS BASED. THE COMPANY AND ITS SUPPLIERS SHALL IN NO EVENT BE LIABLE TO THE PURCHASER, ANY SUCCESSORS IN INTEREST OR ANY BENEFICIARY OR ASSIGNEE OF THE CONTRACT FOR ANY CONSEQUENTIAL INCIDENTAL, INDIRECT,
WARRANTY

SPECIAL OR PUNITIVE DAMAGES ARISING OUT OF THE CONTRACT, OR ANY BREACH HEREOF, OR ANY DEFECT IN, OR FAILURE OF, OR MALFUNCTION OF THE EQUIPMENT SUPPLIED HEREUNDER WHETHER BASED UPON LOSS OF USE, LOST PROFITS, REVENUE OR INTEREST, LOST GOODWILL, WORK STOPPAGE, IMPAIRMENT OF OTHER GOODS, LOSS BY REASON OF SHUTDOWN OR NON-OPERATION, INCREASED EXPENSES OF OPERATION, COST OF PURCHASE OF REPLACEMENT POWER OR CLAIMS OF THE PURCHASER OR CUSTOMERS OF THE PURCHASER FOR SERVICE INTERRUPTION, WHETHER OR NOT SUCH LOSS OR DAMAGE IS BASED ON CONTRACT, WARRANTY, TORT, NEGLIGENCE, INDEMNITY, STRICT LIABILITY OR OTHERWISE.

VIOLATIONS OF LAW

The Company shall not be bound by or required to adhere to any term or provision of a purchase order, quotation, bid, letter of credit or like document or any provision of law, regulation or custom, which would cause the Company, its parent or any of its affiliates to be in violation of or fail to comply with the export laws, taxing statutes or regulations of the country wherein the Equipment is manufactured or from which it is exported or is otherwise subject to jurisdiction.

GOVERNING LAW

The rights and obligations of the Purchaser and the Company shall be governed and construed in accordance with the laws of the Republic of Ireland and the Purchaser submits to the exclusive jurisdiction of the Irish Courts.

MODIFICATIONS, SEVERABILITY AND ENTIRE AGREEMENT

The Company shall not be bound by any amendment or any modification to the Contract until approved in writing by an officer of the Company. The Contract when so approved, shall supersede all previous communications, either oral or written. If any clause of the Contract is held by any competent authority to be invalid or unenforceable in whole or in part, the other clauses of the Contract and the remainder of the clause in question shall not be affected thereby.

A detailed description of terms and conditions of sale can be found on QR39 Geith terms and conditions of sale which was attached to your order acknowledgement. If you do not have a copy you can contact your nearest Geith Distributor.
