

GEITH MX BUCKETS

Integrated Web Plate

Optional Bolt
on Edge Available

Bottom Wear Straps

Thick Side Cutters

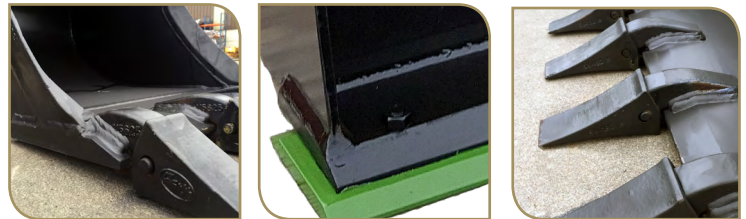

Digging & Grading

Durability

- ▶ Thick leading side cutter for extra strength and wear protection which will help you get the most value out of your bucket
- ▶ Bottom wear straps extend over 90% of the bucket providing added strength and protection
- ▶ The grading bucket web plate is integrated into the section assembly to give additional strength and distributing stresses evenly through the bucket. The web plate slim design provides more space allowing for easier transport for your digging buckets.

Productivity

- ▶ With the fittings designed for each specific mini excavator the bucket has maximised breakout force and optimised rotation angle capacity ensuring optimum productivity. This results in time and fuel savings

Versatility

- ▶ MX buckets are available for excavators ranging in size from 1 to 11 tons
- ▶ Buckets are available with pin on systems to specifically match your requirements
- ▶ Designed to suit to the kinematics of your machine to optimise the fully open and closed position of your bucket for loading material
- ▶ Equipped with the most popular bolted teeth models (Kubota, JCB, Massey) or welded teeth (Geith 180)
- ▶ Grading buckets available with bolt on reversible cutting edge as an option
